THE HOLDER REWARD ERA | EDITION VOL. 01

LEOPARD BSC WHITEPAPER

Trade. Hold. Join the hunt. Weekly On-Chain Holder Reward Protocol on BNB Smart Chain.

01. EXECUTIVE SUMMARY & VISION

LEOPARD BSC is a holder-focused reward token deployed on Binance Smart Chain (BSC, Chain ID: 56). Instead of complex staking lockups or custodial vaults, LEOPARD channels a fixed 10% smart-contract tax on every buy and every sell into a transparent weekly USD-denominated reward pool for verified holders.

Holders keep full self-custody of their tokens at all times. By holding at least $25 USD in LEOPARD and completing a one-time gasless wallet registration, holders earn Participation Points that weight their selection probability at the end of every 7-day cycle.

Official Network	`Binance Smart Chain (BSC / BEP-20, Chain ID: 56)`
Token Contract (Renounced)	`0x4efab39b14167da54aebed2094a61aa1fd384056`
Reward / Tax Collection Wallet	`0x7A2Fe13dE953aF1cf836729E3e1Ca66cfBd0e6Ab`
Primary DEX	`PancakeSwap V2 (BSC)`
Contract Buy / Sell Tax	`10% on each Buy / 10% on each Sell (0% extra website fee)`
Minimum Eligibility Holding	`$25.00 USD in LEOPARD (1 Participation Point per $25 USD)`
Weekly Winner Slots	`5 Initial Slots scaling up to 100 Maximum Slots`

02. TOKENOMICS & FIXED 10% TAX MECHANISM

The LEOPARD token contract is renounced and enforces a fixed 10% tax on each buy transaction and 10% tax on each sell transaction on-chain. This website does not charge any additional fee or tax.

- **On-Chain Accumulation: Every confirmed buy and sell transfer feeds the** developer-controlled reward wallet (0x7A2Fe13dE953aF1cf836729E3e1Ca66cfBd0e6Ab).
- **Verified Accounting: Incoming tax contributions are indexed by transaction hash and** block number. Only verified accounting is displayed as the active reward pool balance.
- **Renounced Ownership: Contract ownership is renounced, ensuring tax rates cannot be** arbitrarily raised and no new tokens can be minted.

03. PARTICIPATION POINTS & ELIGIBILITY ($25 = 1 POINT)

Eligibility requires holding at least $25 USD of LEOPARD in a registered BSC wallet. Participation weight scales linearly with verified USD value using a strict floor formula:

Formula	`Participation Points = floor(Verified Holding USD / $25)`
$25 - $49.99 USD Holding	`1 Participation Point (1x base selection weight)`
$100.00 USD Holding	`4 Participation Points (4x base selection weight)`
$500.00 USD Holding	`20 Participation Points (20x base selection weight)`
$1,000.00 USD Holding	`40 Participation Points (40x base selection weight)`

Live Point Synchronization: Participation points rise or fall automatically every 6 seconds as a holder buys or sells tokens or as the live LEOPARD market price fluctuates. Final selection weights are locked when the DAY 7/7 on-chain balance snapshot is taken.

04. DYNAMIC WINNER SLOT SCALING (5 TO 100 SLOTS)

Every weekly round starts with 5 guaranteed winner slots and automatically unlocks additional winner slots as the verified reward pool grows, up to a ceiling of 100 winner slots per week:

Pool Under $1,000 USD	`5 Winner Slots (Base Lineup; +1 slot at $1,400 USD)`
$1,000 - $5,000 USD Pool	`5 to 15 Winner Slots (+1 slot per $400 USD pool growth)`
$5,000 - $25,000 USD Pool	`15 to 40 Winner Slots (+1 slot per $800 USD pool growth)`
$25,000 - $100,000+ USD Pool	`40 to 100 Winner Slots (+1 slot per $1,250 USD pool growth)`
Canonical Milestones	`5 Slots ($1k) -> 15 Slots ($5k) -> 40 Slots ($25k) -> 100 Slots ($100k)`

05. HOLDER ECOSYSTEM TIERS

- **Starter Holders (1 - 3 Points | $25 - $99 USD): Entry-level verified holders** participating in weekly draws.
- **Core Holders (4 - 19 Points | $100 - $499 USD): Established community holders building** multi-point selection weight.
- **Apex Hunters (20 - 39 Points | $500 - $999 USD): High-conviction holders commanding** significant pool weight.
- **Alpha Guardians (40+ Points | $1,000+ USD): Top-tier liquidity pillars with 40x+** selection weight.

06. GASLESS ONE-TIME REGISTRATION & SECURITY

Holders register once by connecting a BSC wallet (MetaMask, Trust Wallet, Binance Wallet, or WalletConnect) and signing a standard EIP-191 off-chain message: "I register my wallet for the weekly LEOPARD Reward Pool."

- **Zero Gas Cost: Signing the registration proof is completely free and executes off-chain.**
- **No Token Approvals: Registration never requests token spending permissions, private** keys, or seed phrases.
- **Live Verification: A registration or wallet connection alone does not confirm balance;** holdings are verified directly against BSC RPC nodes and live DEX/market price feeds.

07. THE 7-DAY WEEKLY CYCLE, SNAPSHOT & SETTLEMENT

- **Phase 1 - Accumulation (Day 1/7 to Day 7/7): 7-day countdown (604,800 seconds) during** which buy and sell tax contributions build the active pool and unlock winner slots.

- **Phase 2 - Shared On-Chain Snapshot: After Day 7/7 concludes, the protocol records a** shared BSC block number, live LEOPARD USD price, eligible holder count, and total pool points.
- **Phase 3 - Point-Weighted Selection: Winners are selected using weighted random sampling** without replacement. More points provide greater selection probability, not a guaranteed prize. Each wallet can win at most one slot per round.
- **Phase 4 - Confirmed Payouts Before Reset: Selection precedes payment. Rewards are** distributed from the developer-controlled wallet, and the weekly pool resets ONLY after all winner payouts are confirmed on-chain.

08. TRANSPARENCY, ARENA VISUALIZATION & DISCLAIMERS

The Golden Arena (/arena) and Holder Registration portal (/register) provide real-time visibility into the active reward pool, slot unlock milestones, holder leaderboard, weight distribution tiers, and historical round archives with on-chain BSC transaction hashes.

Disclaimer: Cryptocurrency holdings involve market risk and price volatility. Holding LEOPARD and accumulating Participation Points increases statistical selection weight in the weekly draw but does not guarantee selection or financial return. Always verify the official BSC contract address (0x4efab39b14167da54aebed2094a61aa1fd384056) before trading.
